EDUCATION

Bachelor of Science in Cybersecurity May 2028

University of South Florida | Tampa, FL | GPA: 3.91 | Dean's List (2 Semesters)

SKILLS

Programming Languages: Python, C, JavaScript, HTML, CSS

Cloud & DevOps: Microsoft Azure App Service, Git, GitHub, CI/CD via GitHub Actions

Cybersecurity & Networking: Wireshark, Nmap, John the Ripper, Burp Suite, Shodan, SSH & Key-Based Authentication

APIs & Authentication: OAuth 2.0 + PKCE, Salesforce REST API, SOQL, REST API Integration, Data Parsing

Frameworks & Libraries: Flask, Tailwind CSS

AI/ML: LLM Integration, Intent Parsing

WORK EXPERIENCE

AI & Business Systems Intern — Advantive LLC Jun 2026 – Present

- Designed and deployed 3 full-stack production dashboards (Renewal Command Center, Multi-Site Pre-Flight Agent, Evergreen Renewal Center) used daily by CS, RevOps, and Finance teams, saving stakeholders hours of manual reporting per week
- Implemented OAuth 2.0 with PKCE for secure Salesforce API authentication across all tools, navigating enterprise SSO constraints and eliminating credential-based access
- Built Flask REST API backends, wrote complex SOQL queries against live Salesforce data, and deployed applications to Microsoft Azure App Service with automated CI/CD via GitHub Actions
- Applied access control best practices by designing all integrations as read-only, ensuring data integrity and minimizing security exposure across production systems

Information Network Specialist Assistant — TransJamaica Highway May 2023 – Jul 2023

- Supported network infrastructure monitoring, troubleshooting connectivity issues, and hardware configuration across multiple toll booth locations

Facilities Supervisor — University of South Florida, Campus Recreation Center Sep 2025 – Present

- Supervises facilities and fitness staff, ensuring efficient daily operations of the recreation center

PROJECTS

Canvas Copilot — Hack USF (24-Hour Hackathon)

- Built an AI academic assistant integrating Google Gemini for natural language querying of Canvas LMS data and Azure Custom Vision for real-time study space detection
- Applied full-stack development and multi-API integration (Canvas, Azure, Google) with a Tailwind CSS UI under hackathon time constraints

Code Path — Mitigating Ransomware Risk in Business

- Developed a 4-layer cybersecurity framework to prevent, detect, and recover from ransomware attacks, incorporating EDR, Air-Gapped Backup (3-2-1-1 Rule), and phishing mitigation strategies

Code Path — Password Crack-a-thon

- Cracked 500+ of 1,000 leaked password hashes using John the Ripper with wordlists, custom rules, and mask attacks; documented security takeaways including entropy, salting, and slow hashing algorithms

CLUBS & ORGANIZATIONS

USF CyberHerd — Competitive Cybersecurity Team Fall 2025 – Present

- Selected member of USF's elite competitive cybersecurity team, to compete in red/blue team exercises, CTF challenges, and national-level cybersecurity competitions against top-tier universities

Whitehatters Computer Security Club — Member Sep 2025 – Present

- Engage in weekly CTF practices and hands-on labs (web, crypto, forensics)

National Society of Black Engineers (NSBE) Nov 2024 – Present

- Attend chapter meetings and professional-development sessions; prepare for conferences and career fairs
